

“NEW PORTABLE VINYL SIDING AND ALUMINUM CUTTER TOOL”

ABSTRACT OF THE DISCLOSURE

A cutting tool is provided, comprising a guide member with a channel, attached to a support arm. A body piece is also provided, and has an attached handle and cutting assembly. The body piece may be positioned at any point along the support arm, its cutting assembly thus being positionable to select a cut line such that a workpiece may be severed or scored at virtually any width desired. A method of cutting a sheet material is also provided, which employs the aforementioned cutting tool.
